## CERTIFIED NURSERIES

Nurseries listed in this publication have been inspected and certified to sell nursery stock in the state of Mississippi from July 1, 2004 to June 30, 2005. A certificate signifies the nursery has met all requirements of the Mississippi Plant Act and the stock is apparently free of injurious pests and plant diseases. Issuance of a certificate is based upon periodic inspection of nursery stock by an official with the Bureau of Plant Industry.

Nursery certificates should accompany each shipment of nursery stock to other states and should be issued for nursery stock to be resold. Special requirements must be met to ship to California, Arizona, Washington and other states north and west of Mississippi where imported fire ants are not known to occur. Individual nurseries sending plant materials to these states should contact the Bureau before shipping. Nursery producers who have questions about nursery inspections and certification procedures can contact the Bureau at 662-325-3390.

## NURSERY DEALERS

Nursery Dealers are individual firms, partnerships or corporations that purchase and resell plant materials to customers. This includes farm supply stores, supermarkets, chain stores and hardware stores.

Nursery dealers are required to file a Nursery Dealer Agreement Form at the beginning of each year with the Bureau of Plant Industry. Nursery stock purchased must have a valid certificate of inspection for each shipment. Nursery stock sold by a nursery dealer is routinely inspected for injurious insects, diseases and plant viability by an official with the Bureau of Plant Industry.

## Explanation of Categories Listed for Certified Nurseries

### Classification

1. Commercial grower: Nursery operation in which more than 50 percent of the nursery stock sold or distributed is stock grown by that nursery and may include such plant material as rooted liners or seedlings.
2. Nursery outlet: Nursery operation in which less than 50 percent of the nursery stock sold is grown by that nursery. Example: garden centers where most of the nursery stock on hand has been procured from other nurseries as ready-for-sale plants.
3. Non-commercial grower: Same as a commercial grower, but the individual or partnership that operates the nursery does not depend completely on the sale of nursery stock as a source of income. Examples include an individual working full-time elsewhere to supplement income from the nursery or a "back-yard" type grower who handles a low volume of nursery stock and makes infrequent sales.

### Sales Structure

- A. Wholesale: All sales of nursery stock are made to other nurseries, persons and firms that re-sell nursery stock.
- B. Retail: All sales of nursery stock are made directly to the consumer, with no further marketing of the stock.
- C. Combination: All sales of nursery stock are made to both wholesalers and consumers.
